## 6. World Skate Europe and Event Logistics

### 6.1. Introduction

For the organization of the Event, many competencies are deployed on both sport's side and managerial side. Proposing the best conditions for those people to deploy its competences at its best is key. By "conditions" we mean all the materials, accommodations, meals, services, best place to work etc.

In that sense, we might prefer hosting our team closer to the venue in a decent place than encouraging highest accommodation quality, when it implies relying on an uncertain transport service. We might prefer a big table near the field of play where a team can sit and work than an office too far from the FOP where people effectively work that imposes many goings and comings. We encourage common sense, with the principle set that everything must be achieved to put all the people working for the event's delivery in their best conditions.
